

# RECYCLED TUNGSTEN

## A Complete Carbide Production Cycle Ensuring Global Supply Stability.

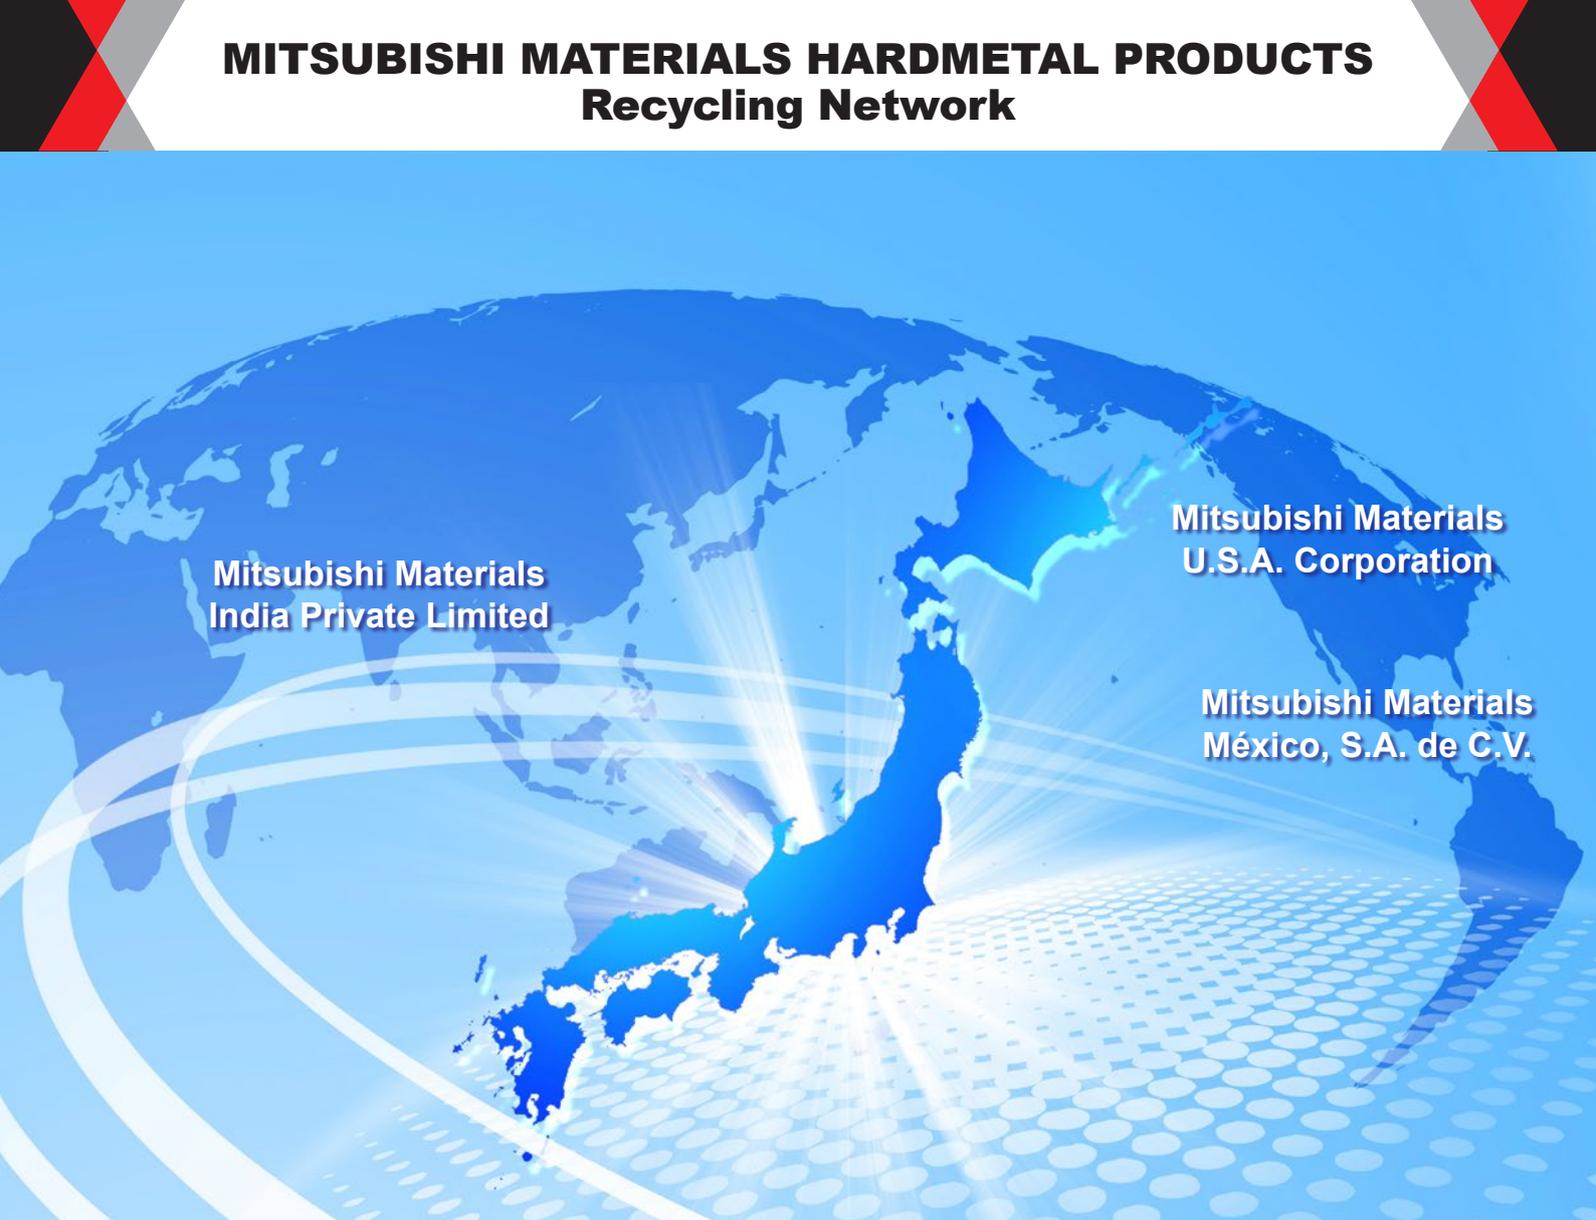

The Mitsubishi Materials Group, to which Mitsubishi Materials Hardmetal belongs, has made resource recycling a major pillar of its activities under the slogan "For People, Society, and the Earth."

Mitsubishi Materials Group leverages its long-standing experience and distinctive production system to handle everything from raw material powder development to the manufacturing and supply of carbide tools.

We will further strengthen our efforts for resource recycling so that we can play a unified role in the global recycling of tungsten.
